2. This question paper consists of **TWO (2) sections**. Answer all questions.
3. Please write all your answers in the Answer Booklet provided.

SECTION A (40 marks)**Malaysian start-up, Wobb is disrupting recruitment and hiring**

Recruiters worldwide will tell you that job matching isn't a simple, foolproof process, for either the prospective employee or the employer.

There's always the danger of hiring someone who interviews well but who isn't the right cultural fit for the organization.

If only there were a tool which would make the process easier and more foolproof. The end result would be better for all concerned; employers would have an employee who was the perfect fit for the company, and employees would likely remain with the company longer and more content.

Malaysian job search platform, Wobb, seems to have struck proverbial gold, with just the right tool. Wobb, founded back in 2014 and which stands for 'Working On Bean Bags,' was conceived by entrepreneur Derek Toh, who left his corporate job two weeks after the idea of Wobb entered his brain.

Toh was convinced that the venture would be a success, and fast forward to the present, he was actually right. Wobb's website and mobile app gained traction quickly as soon as the platform was launched and it currently boasts over 60k job seekers. Millennials were Wobb's goal audience from the get-go, and it is indeed the Millennials who can be counted as the majority of its users.

Wobb's Marketing and Profit Head, Shakira Kavanagh said that no other job portal focuses on transparency of company culture in the way Wobb does. And considering that the current generation of young professionals prioritizes this when looking for a company to work for, Wobb is the place for them to search for jobs until their heart's content.

One of the ways in which Wobb assists in divulging a company's transparency is through a virtual tour of a potential workplace, available to all users. Wobb also enables employers to present themselves to the best and brightest talent in Malaysia.

Wobb has had many headline achievements, among them, the company has earned CIP Catalyst Cradle Funds at a total of RM650,000 (over USD\$160,000), and has secured RM1.7 million (over USD\$420,000) from a crowdfunding operation.

On top of this, Wobb has also signed a partnership with LinkedIn, acting as their official content partner, and has earned RM2 million (nearly USD\$500,000) in revenue since it started charging for its services in 2016.

The site's web application framework is written using Ruby on Rails, while also relying on cloud services provided by Amazon and Google, to store and deploy its code. Chief Technology Officer CK Leong said, "This allows us to quickly and efficiently collaborate on writing code and sharing ideas, adding in features and iterating improvements constantly."

Wobb seems to have a good grasp on its audience's needs, as well as that of employers. No wonder it's such a hit; Kavanagh added, "It's no longer just about the job description, after all, you can do the same job in multiple companies. It's the company culture that makes a difference as to how fulfilled you are in your career."
